

Work Product Dashboard User Flow Document

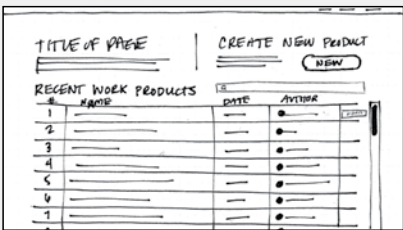

Version #1

Terminology

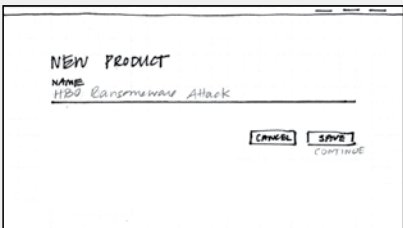

In an effort to understand the many facets and details of this tool, the user flow, and unique development features, below is a list of terms used in this document. The following terms may be changed should a better term or definition exist.

1. **Work Product:**
The collection of objects that share a grounded set of boundaries to explain a topic. (e.g. the HBO Ransomware Attack)
2. **Object:**
A grouped set of properties that describe or represent an adversary action. (e.g. one step in the HBO attack)
3. **Boundaries / bounds** (limiters):
A set of criteria in a Work Product used to refine a search for Objects in the database (e.g. Ransomware in 2017)
4. **Unbound:**
An exploratory view where no boundaries have been selected, however additional objects may be selected/ added.

High Level User Flow

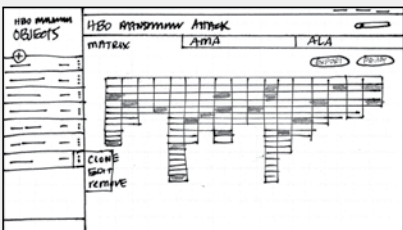

Work Product Home Screen

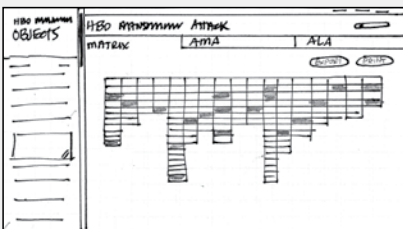

Work Product Creation Screen

Add Object(s) Screen

Work Product Dashboard Screen (Object list view)

Work Product Dashboard Screen (Object data entry view)

Work Product Home Screen (select or create Work Product)

High-level Description:

- Screen Title
- Button to create a new Work Product
- List of recent or all Work Products with ability to search and sort. User can select/open one item that would take them to the Work Product Dashboard.
- The Work Product list could show Name, Date Created, and Author. This could change if other criteria better informs the user about an individual Work Product.
- Search bar to refine the list. We may add filters to allow for a more detailed search.

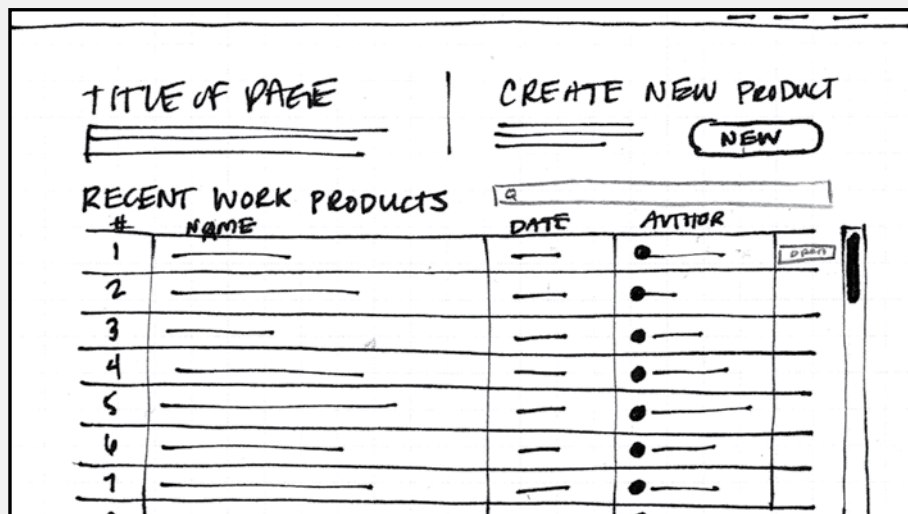

Questions:

none

Notes:

none

Work Product Home Screen

Work Product Creation Screen (set Work Product name)

High-level Description:

- Form
- Name field (free text)
- Cancel button
- Save or Continue button to progress user to next screen.

Questions:

If user chooses to cancel the Work Product, what page do they land on?

If users cannot be tracked, should there be a field for Work Product Owner/Author?

Notes:

none

Work Product Creation Screen

NEW PRODUCT

NAME

HBO Ransomware Attack

CANCEL SAVE

CONTINUE

Work Product Creation Screen - Alternate (set Work Product name & boundaries)

High-level Description:

- Form
- Name field (free text)
- Add Optional Boundaries: Intrusion Set multi-selection drop down. All selected labels appear as removable labels under dropdown menu.
- Start date selector
- End date selector
- Target dropdown (possibly with ability to type/ add a new item)
- Malware dropdown (possibly with ability to type/ add a new item)

- Cancel button
- Save or Continue button which progresses user to the next screen.

Questions:

Should users be able to add Intrusion Sets, Targets, and Malware to the database from this page?

Will adding data to this Work Product outside of these boundaries auto-update the boundaries?

Notes:

Data Entry Users may not be prepared to set bounds from the start.

Work Product Creation Screen

NEW PRODUCT

NAME
HBO Ransomware Attack

BOUNDRIES ☐ ☒ ☐ ☐ ☒ ☐ ☐

Intrusion APT29 ▼ **Start Date** 7/1/17 ▼ **End Date** 8/1/17 ▼ **Target** HBO **malware** Wanna ▼

Add Object(s) Screen

(add existing Objects from database to your Work Product)

High-level Description:

- Name of Work Product
- Boundaries of Work Project
- Button to edit boundaries
- Object title
- Search bar to refine Object list. All search terms appear as removable labels under search bar
- List of Objects that match boundary criteria
- Check boxes to select Objects

- Filter by title, author, creation date, etc.

- [not shown, below fold] Save or Continue button to progress user to the next screen.

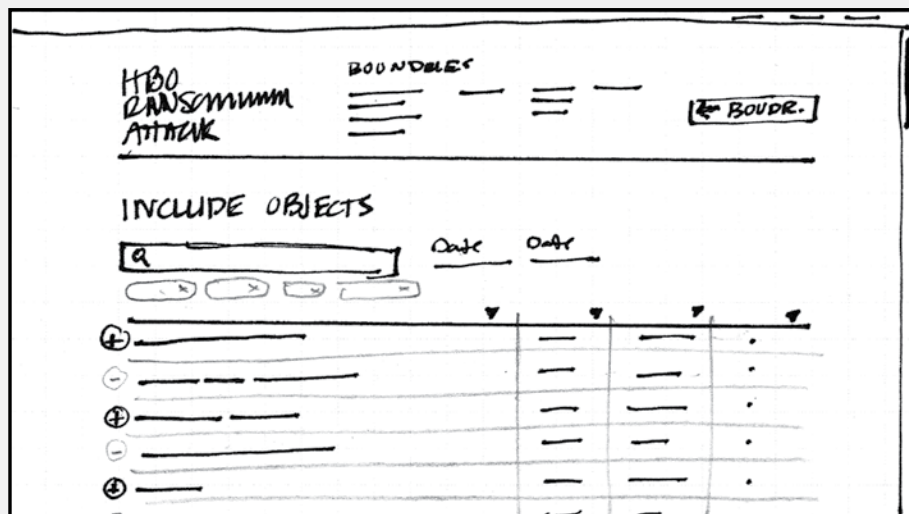

Questions:

none

Notes:

Existing Object concept will become useful as the database grows.

Add Object(s) Screen

Work Product Dashboard Screen (Object list and dashboard view)

High-level Description:

Left Sidebar:

- Work Product Name
- Add New Object action button
- List of included objects
- Menu on each Object
 - Clone
 - Edit
 - Remove

Content Canvas Items (dashboard content):

- Work Product Name
- Zoom tool(s)
- Three tabs to toggle/navigate between:
 - Matrix (AFA)

- Mitigations (AMA)
- Lifecycle (ALA)

- Export button (PDF or PNG/JPG)
- Print button (if this feature is too difficult to develop, Export will suffice)

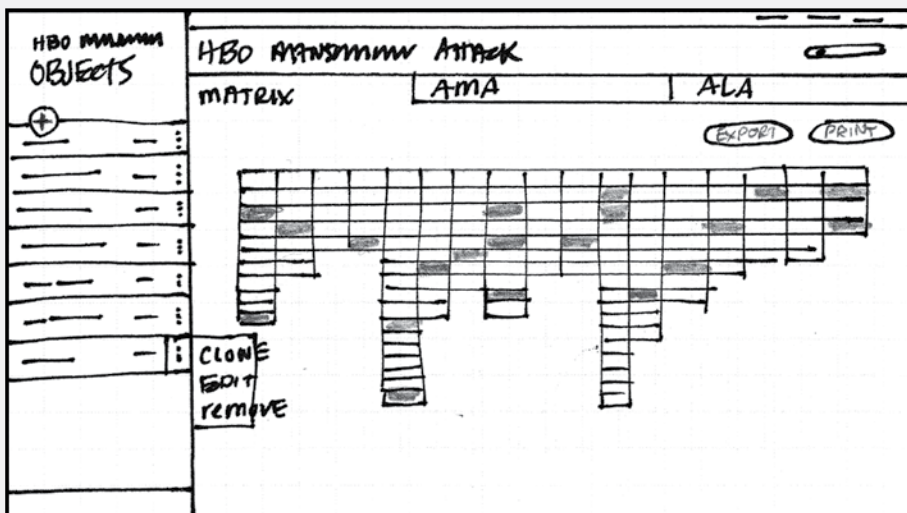

Questions:

none

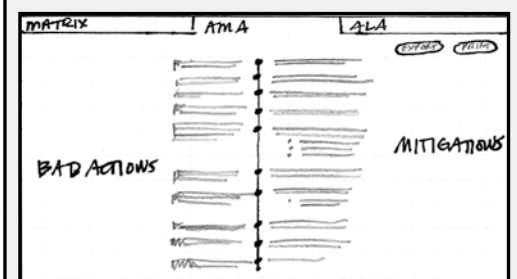

Notes:

We recommend laying this out in Sketch for client presentation on 8/23.

Work Product Dashboard Screen (Object list view)

AMA tab

Work Product Dashboard Screen (Object creation and dashboard view)

High-level Description:

Left Sidebar:

- Object Date entry fields
 - Object name/phrase
 - Kill Chain Phase(s), User will select and add Kill Chain Phases as necessary to group Attack Patterns
 - Attack Pattern(s)
 - Date Selection
 - Intrusion Set(s)
 - Comment(s)
 - Description
 - External Source(s)
 - Malware Type(s)
- Scroll Bar
- [not shown, below fold] Save button
- [not shown, below fold] Clone button

Content Canvas (dashboard content):

- Work Product Name

- Zoom tool(s)
- Three tabs to toggle/navigate between:
 - Matrix (AFA), shown
 - Mitigation (AMA)
 - Lifecycle (ALA)
- Export button (PDF or PNG/JPG)
- Print button (if this feature is too difficult to develop, Export will suffice)

Questions:

Please confirm that we will not be integrating “Stages” into the data entry and view workflow as this is specific to customers and not MITRE/STIX data.

Notes:

We recommend laying this out in Sketch for client presentation on 8/23.
